

Mexico's Emission Reduction Initiative

December, 2016

Specific actions to address indicators 7.2, 8.2 y 9.1

- Analysis of variance contribution of emissions
- Strategy to reduce uncertainties in key categories

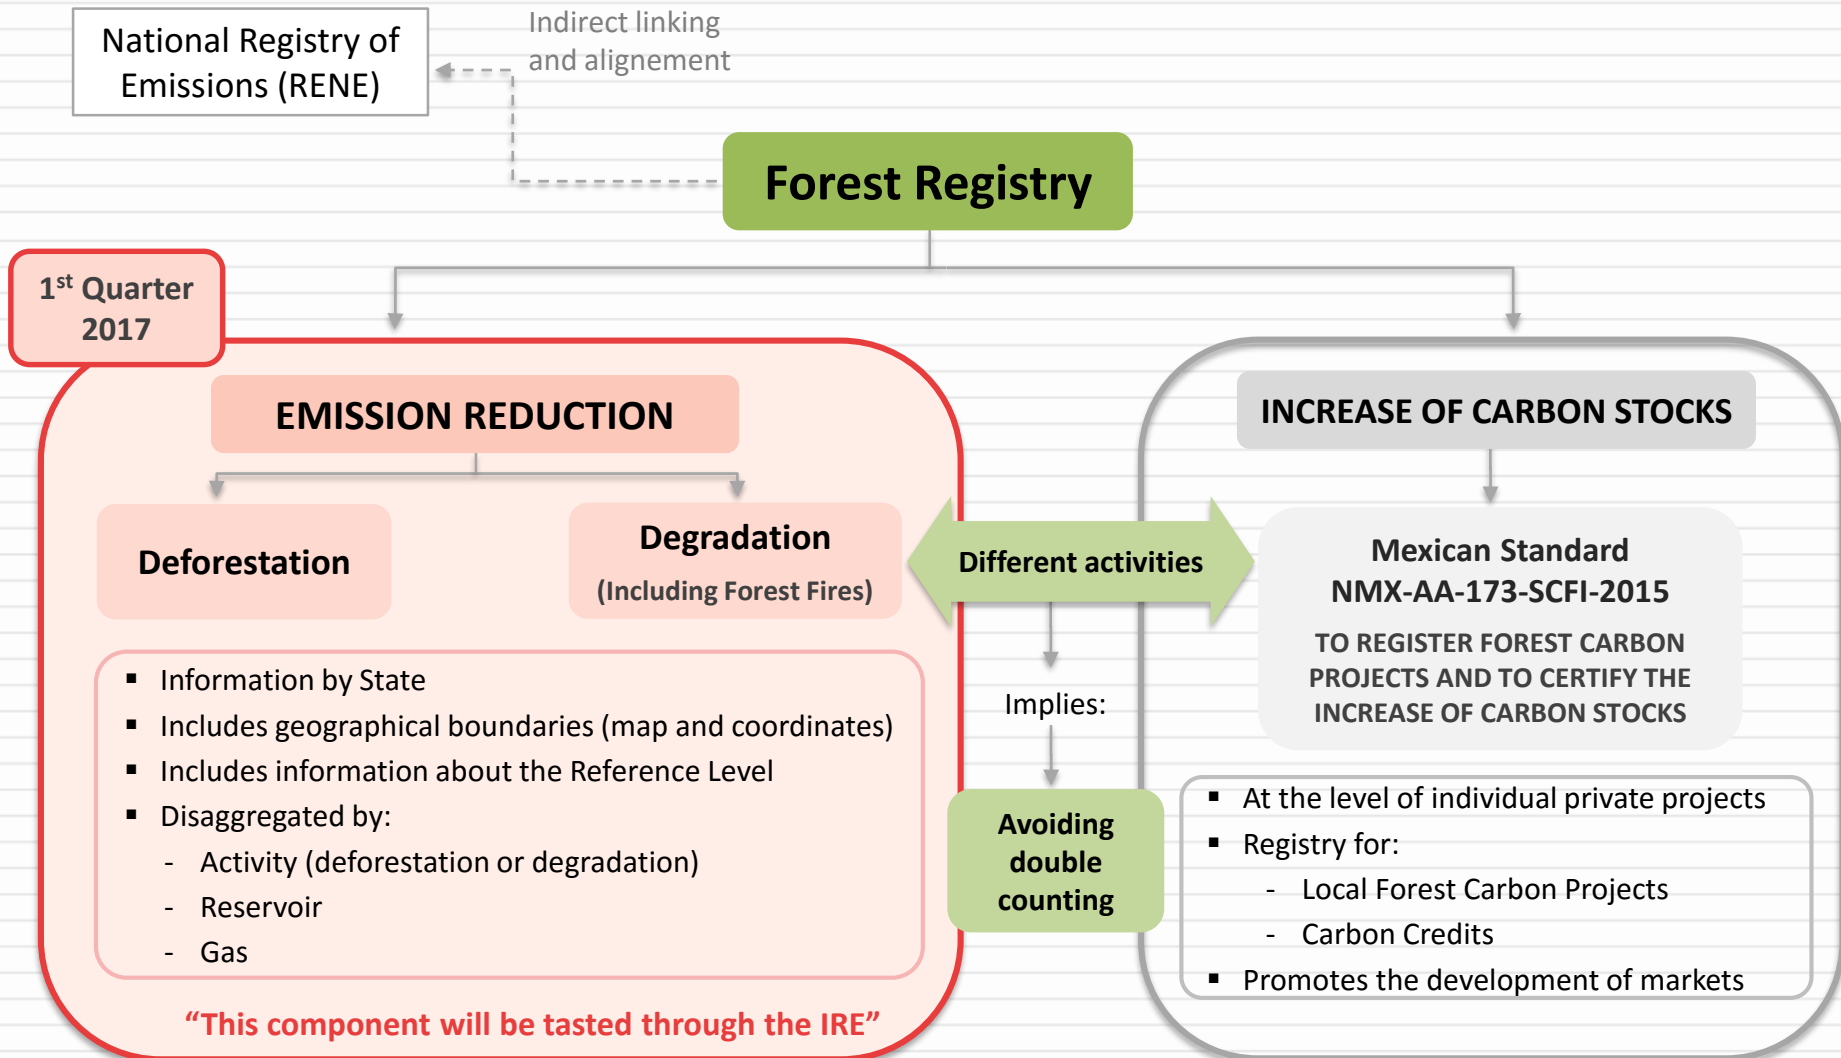

January-April

April-May

2017

Emission Reduction Registry

Emission Reduction Registry

REDUCING THE RISK OF DOUBLE COUNTING OF EMISSION REDUCTIONS

Operational check

- Manual revision to identify whether or not a project (or initiative/program) has been registered.

Serial numbers

- Serial numbers assigned to the Emission Reduction
- Algorithmic check to ensure that the serial number created is unique.

GPS and GIS

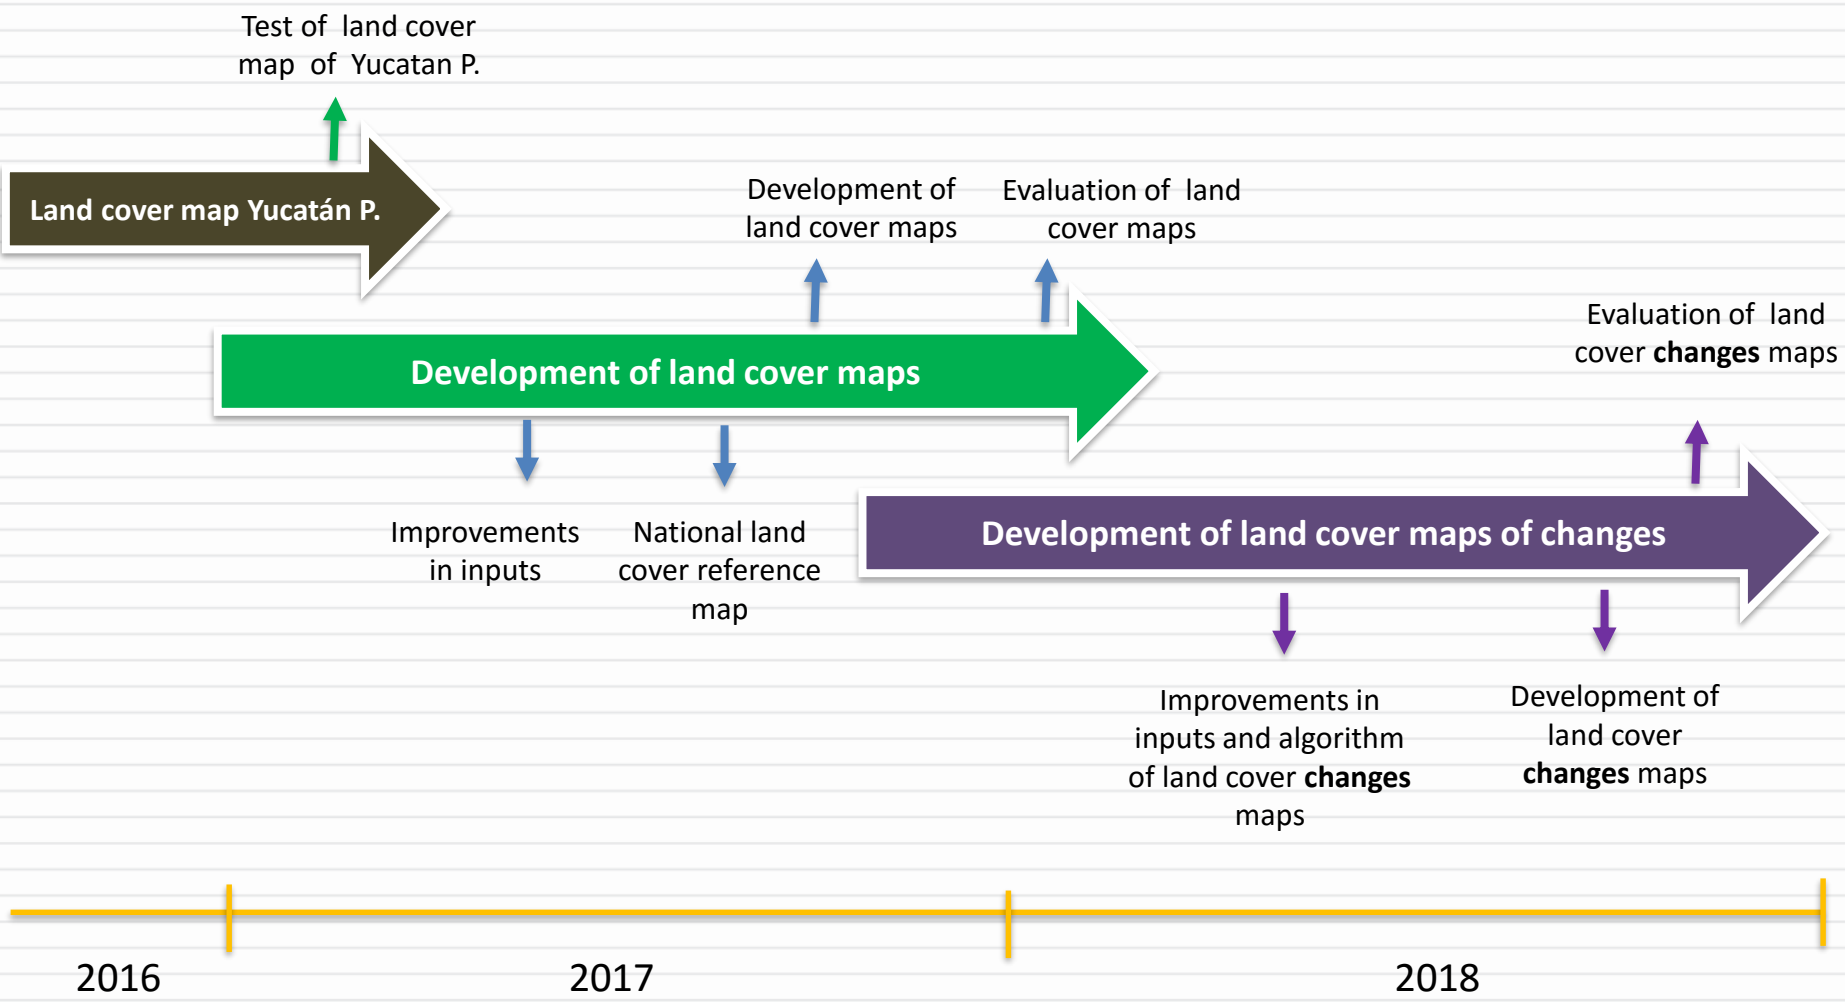

- Geographical check on the existence of its projects or other activities in the zone.
- A warning system which issues an alert.
- Request of confirmation that the project or program is a different and unique project.

Links with other Registries

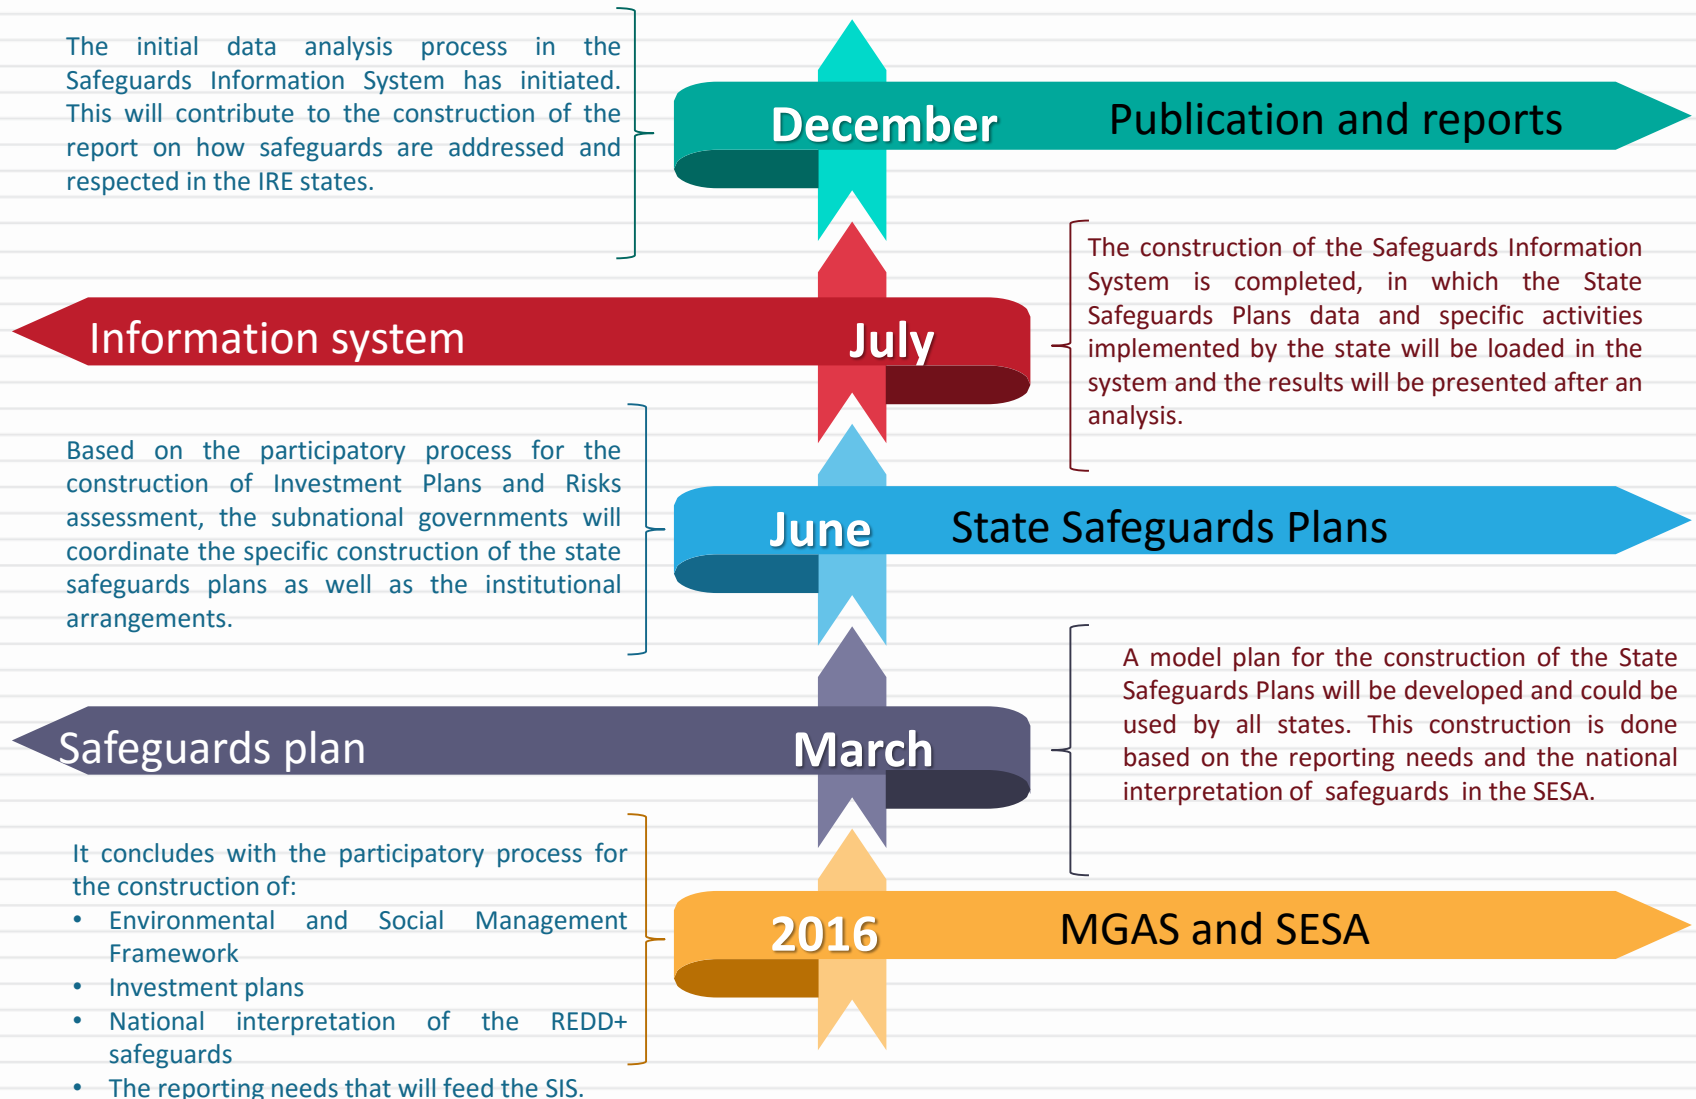

- Indirect link with the National Register of Emissions (RENE) and other internationally recognized standards.

Review of national and international standards registries

Roadmap for the implementation of MAD-Mex system

Environmental and social safeguards

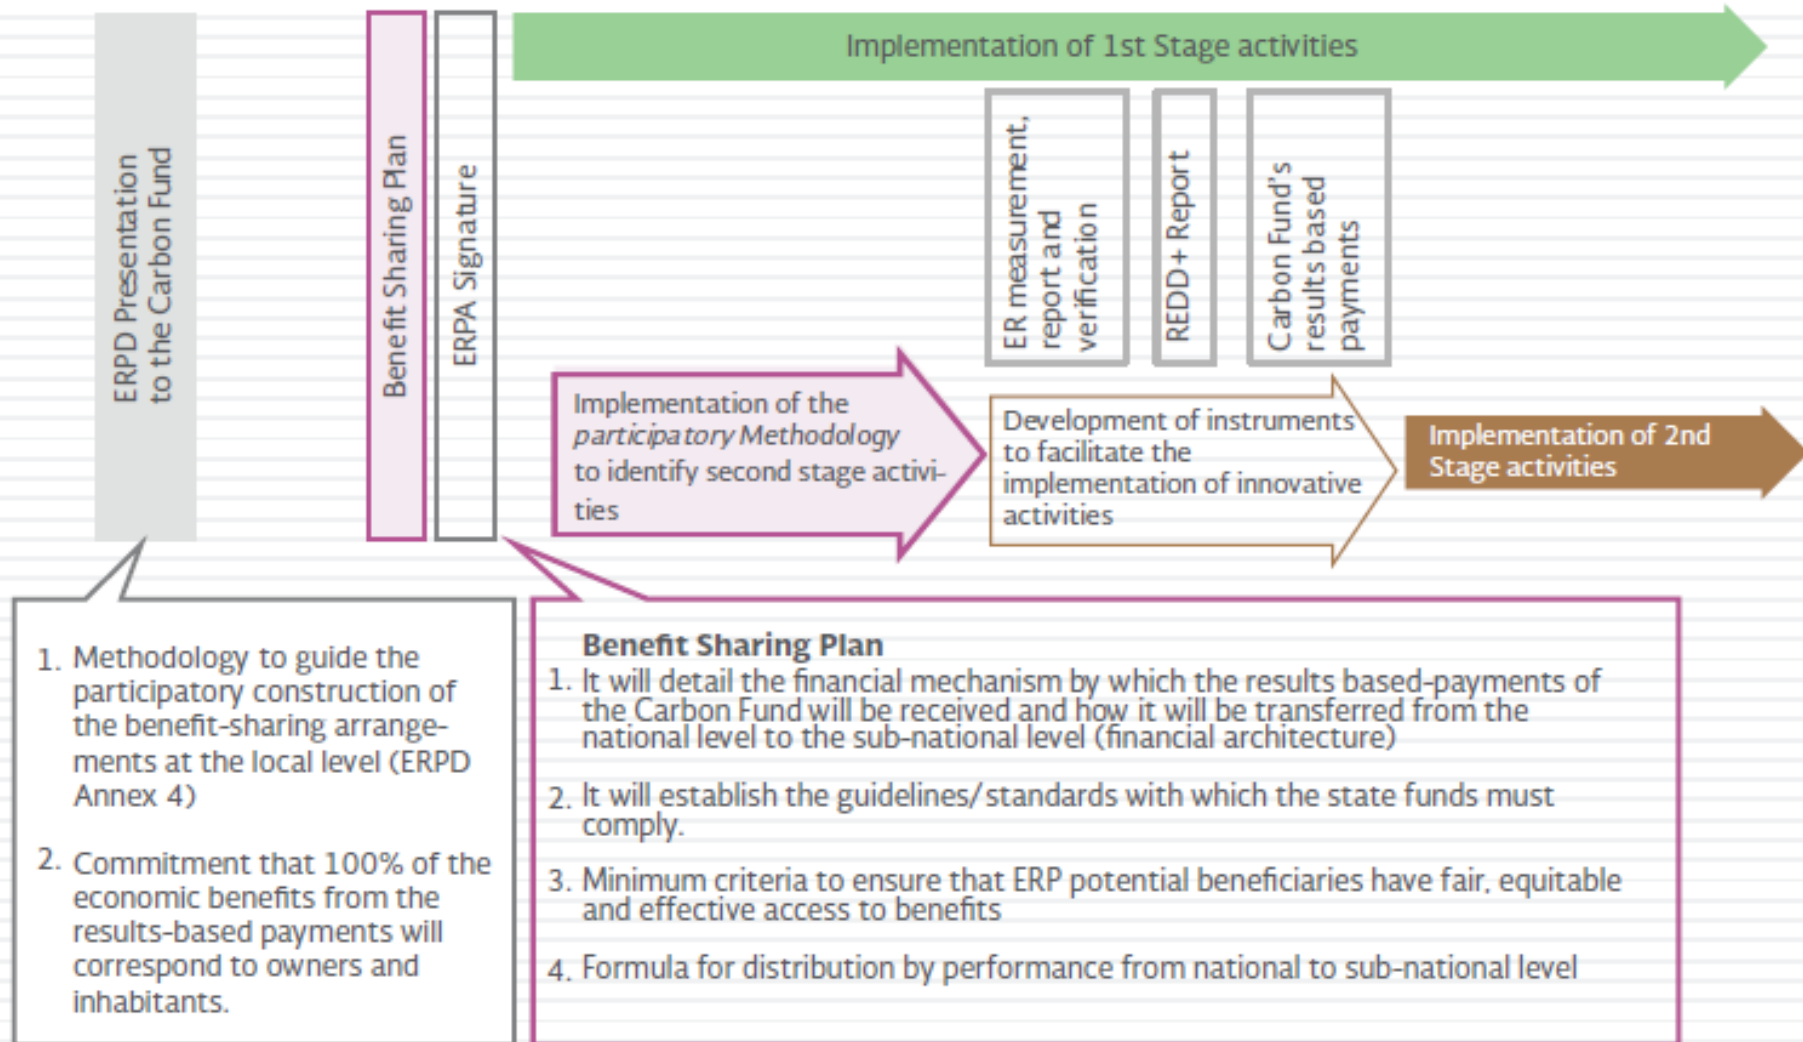

Title of Emissions Reductions

- The State has the sovereignty over the national development
- The State designs and implement public policies in order to guarantee the human right to a healthy environment
- Public policies should be oriented in order to avoid environmental damage and deterioration
- The State has the right to enact on private property the modalities dictated by the public interest
- Essential and strategic goods for life can not be the object of private appropriation
- In Mexico, deforestation constitutes a prohibition sanctioned by the State
- Emissions are considered as a negative externality
- The ownership of the emissions is not linked to ownership or land tenure

Facultad de la CONAFOR para negociar

- The transitory article 3 of the General Law on Climate Change states that CONAFOR will design strategies, policies, measures and actions to move forward to a zero percent rate of carbon loss in the original ecosystems
- The Federal Law on Parastatal Entities confers powers to the Director General of CONAFOR to issue, endorse and negotiate credit titles
- In order to carry out the transfer, a verification must be made to certify the quantity of reduced emissions generated and measured and; deliver "Reduced Emissions Transfer Form"
- This form must be issued by CONAFOR, as it is the instrument for documenting the transfers of reduced emissions and the associated payment requests.

Benefit sharing

It complies with national and international provisions and will have broad community support.
