

# REDD+ and Benefit Generation

Erin Myers Madeira, Senior Advisor, Forest Carbon  
June, 2011

# Key Messages

---

- ▶ Benefits need to be built into all phases of REDD+
- ▶ Target key actors and tailor incentives to meet their interests and priorities
- ▶ Ensure legitimacy and equity of program

# Benefits during all phases of REDD

## Readiness

- REDD+ readiness, capacity building, planning.
- **Benefits examples:** technical training, data systems, maps, learning and professional exchange, improved stakeholder participation in land use planning, employment opportunities, identification of new enterprises

## Early Implementation

- Institutional strengthening, policy reforms and measures, and demonstration activities.
- **Benefits examples:** cross-sectoral spatial planning, new enterprises, employment, training and capacity, social programs, regulatory streamlining, pay-for-performance funding

## Full Implementation

- Widespread implementation of strategies, policy reforms, new low-carbon industries. Robust MRV system, Payment for results
- **Benefit examples:** improved institutional architecture, long and short term employment, new enterprises and low-carbon industries, carbon revenues, technical capacity and partnerships, increased clarity around tenure

# Berau Forest Carbon Program (BFCP)

- ▶ Berau District, East Kalimantan, Indonesia
- ▶ Size: 2.2 million hectares
- ▶ Goal: reduce forest loss by:
  - ▶ Improving logging practices
  - ▶ Shifting oil palm development from primary forests to degraded land
  - ▶ Improving spatial planning
  - ▶ Community-based sustainable development

# Tailoring benefits to target key drivers

Driver	Actors & Interests	Aligning actor interests w. REDD+
Logging	Companies; profits and regulatory certainty	<ul style="list-style-type: none"><li>- Increased regulatory compliance</li><li>- Regulatory streamlining</li><li>- Access to markets</li></ul>
Lack of economic opportunities	Small holders; food security, opportunities for cash income, funding for school and health services	<ul style="list-style-type: none"><li>- Recognized rights</li><li>- Job creation related to REDD+ program</li><li>- New low carbon enterprises</li><li>- Agroforestry training and support</li><li>- Small grants programs</li></ul>

- 
- ▶ In Berau Indonesia, working with timber concessions to implement best practices (FSC+) and access price premium as part of district-wide REDD+ programs
    - ▶ Regulatory streamlining
  - ▶ Working with communities to develop land use management plans
    - ▶ Long-term vision
    - ▶ Mapping supporting tenure
    - ▶ Supporting local governance initiatives
    - ▶ Small grants program
    - ▶ Agroforestry, new enterprises
