

# Chile – FCPF Readiness Preparation Proposal

Participants Committee -- March 2013 – Washington, DC  
Robert Davis, Senior Forestry Specialist, LCSAR, World Bank

## And...

- “*Due Diligence*” mission
- Internal approval by World Bank Management
- Processing of the 3.8 million grant
- Grant signing and effectiveness
- Readiness process with FCPF funding
- Best practices for replication

- **Strong institutional capacity, leadership and political commitment since early development of the R-PP**
- **Current version of the R-PP addresses key issues raised by the World Bank (delivery partner), the TAP and the PC**
- **World Bank Regional Team providing technical assistance to CONAF from R-PIN through RPP (Including forest management, inventory, carbon, governance, social and communications specialists)**
- **Tie-ins with GEF project with World Bank addresses degradation in 5 key ecosystems and NAMA (co-financing Swiss-Chilean)**

- **Institutional arrangements are participatory. Government agencies include forestry, agriculture, environment, indigenous issues, and others. Private landholders, indigenous peoples, academia, NGOs and others participate.**

- **Early engagement and consultation – includes:**

- **description of the early dialogue and capacity building activities,**
- **communication professional to CONAF**
- **consultation methodology for REDD+ to be developed based on free, prior and informed consent.**

- **GHG emissions mostly from forest degradation -- no net deforestation, almost no gross deforestation.**

- **Mitigation from reforestation and sustainable forest management. Possible incentives include reforestation in degraded lands, capacity building and promoting use of forest carbon credits**

## Attributes...

- CONAF maintains a social unit with extensive experience in working with Indigenous Peoples and managing stakeholder consultations and relations in the forest sector. Recent experience includes consultations for the native forests law.

- MRV includes the national forest cadastre and national inventory and monitoring program for forest biomass.
- National focus on climate change mitigation and adaptation inside and outside of the forest sector – tie-ins with energy are important.
- Mainstreaming small producers into forestry and reforestation of degraded lands.

## Next steps...

- Continued stakeholder engagement and participatory development of the REDD+ strategy
- Strengthening cross-sector coordination for REDD+
- Initiating a multi-stakeholder SESA process
- Development of benefit sharing mechanism
- Assessment of land tenure and REDD+
- Proposal for a grievance redress mechanism
- Monitoring degradation – definitions and methods
