

# PC Review of R-PP for Cambodia, March 2011

Review submitted by **Denmark** (Ministry of Foreign Affairs/Danida with inputs from the Forestry & Landscape Department at University of Copenhagen), together with **Nepal** (Ministry of Forests & Soil Conservation)

# some observations

- PC review is largely consistent with the TAP review (on consultations, baseline & scenarios, workplans, capacity development, etc.) there's not much to add...
- Ensure that REDD+ strategy and R-PP are fully aligned with the National Forest Programme (2010-29) & with climate change strategy...
- Clarifications/questions:
  1. links between the FLEGT process/VPA negotiations (?) and the REDD+ strategy
  2. The costs of undertaking the SESA work (is 100,000 USD sufficient?)

# Selected recommendations

- Avoid complex institutional and inter-institutional set up, with many committees, secretariats, advisory bodies, etc. (1a)
- Establish mechanisms and build capacity for conflict resolution, notably with respect to land concessions (2c)
- Establish independent monitoring & evaluation system with regular reporting (6)
