

# **PC17/FCPF Technical Advisory Panel**

## **Uruguay R-PP: Comments and Recommendations by the TAP**

**July 2-July 4, 2014  
FCPF Participants Committee  
Lima, Peru**

**Tomás Schlichter, Eduardo Morales and seven other TAP  
reviewers**

# Country Context: Uruguay

## Uruguay is mostly an urban society

- Total Population: 3.3 million
- Rural population: 5%
- Land area 176,000 Km<sup>2</sup>
- Forests cover: 10%
  - Forest Plantations: 950,000 ha
  - Native Forest: 850.000 ha

# Strengths of the RPP Document

- The proposed Institutional Arrangements include the main stakeholders. The Ministry for Livestock, Agriculture and Fisheries (MAGyP), will lead the process while the Ministry for Housing, Land Use Planning and Environment (MVOTyMA), will be the Focal Point.
- REDD+ strategy options are presented in detail, describing the activities which address the drivers.
- Development of the Reference Level includes ideas about how Forest Inventory and Green House Gas accounting will complement each other

# Key Issues and Recommendations:

- The inclusion of a plan quantifying the importance of the different deforestation and degradation drivers will greatly improve the possibility of assessing the way in which both of them will be dealt with.
- The budget for Component 4a (MRV) needs a detailed breakdown into its sub-activities.

# Overall Summary

Component	TAP Review PC 16 December 2013	TAP PC 17 Review June 2014
1a. National Readiness Management Arrangements	<b>Largely Met</b>	<b>Met</b>
